Product Vision

The Green Energy Cockpit is a Web-Service that offers the analysis, planning, controlling and simulation of a company's energy consumption. It provides the users with a user-friendly UI and enables them to analyse, plan, control and simulate the needed energy of their production processes according to different parameters in a well-arranged way.

#	Effort	Category	Short Name	Item Description	Acceptance Criteria
9		Navigation	Chose functionality	As a logged-in user, I can pick from the different functions of the cockpit.	After clicking the desired function's button I am forwarded to the correct subpage.
10		Extract, Transform, Load	ETL	As a logged-in user, I can preview the transformed data in a database view.	After selecting the right parameters, the database can be previewed in a seperate view.
11		Energy-Analysis	Parameter selection	As a logged-in user, I can choose from a range of different parameters to use for the analysis (WHERE, WHEN, WHAT FOR)	The analysis runs according to the preselected data.
12		Energy-Analysis	Drag & Drop	As a logged-in user, in the Analysis function, I can drag + drop the desired parameters into a field in the desired order.	After running the selected analysis, the data is presented in the preselected way.
13		Energy-Analysis	Filter	As a logged-in user, after setting the parameters, I can filter them according to my needs.	The chosen data changes according to the filtered parameters.
14		Energy-Analysis	Result View	As a logged-in user, I can see the results of the analysis in a table view.	After running the anaylsis, the results are displayed in the way preselected by "Parameter Selection", "Drag & Drop" and "Filter"
15		Energy-Analysis	Diagram View	As a logged-in user, I can choose to display the results of the analysis in different diagrams.	After selecting the desired diagram type, the results of the anaylsis are displayed in a diagram.

#	Effort	Category	Short Name	Item Description	Acceptance Criteria
16		Energy-Analysis	Detailed View	As a logged-in user, I can choose to display the diagrams with detailed data	After selecting the detailed view, all results will be displayed in the chosen diagram view with the necessary data.
